

REMARKS

In the Office Action dated January 30, 2004, a number of informalities in the specification and claim 2 were noted. An objection to the drawings was also presented.

The present amendments to the specification and claim 2 are believed to attend to all of the noted objections, thereby placing the application in condition for allowance. The amendments are all attending to informalities and no new matter is being added by these amendments.

With respect to the objection to the drawings, applicants have amended the specification (paragraph [0025]) to address the examiner's noted objection. In view of the amendment to the specification, it is believed that no amendments to the drawings are required and withdrawal of the objection to the drawings is respectfully solicited.

In view of the amendments and remarks herein, entry of the present amendment and allowance of claims 1-3 are respectfully solicited.

Respectfully submitted,

Paul D. Ackerman
